OUR COMPANY AT A GLANCE

Online Logistics **System** is an automated logistics system created to solve FEA tasks online

Office in China

Office in Turkey

Online
Calculator

IATA Cargo
Agent

Office in Spain

ONLINE CALCULATOR

Calculations, that used to take days, can now be obtained in minutes!

Instant calculations

More than **500,000** shipping options

Sorting and filtering

The screenshot shows a web-based shipping calculator interface. At the top, it displays the route from 'Shanghai, Carrier's Terminal' to 'Hamburg, Carrier's Terminal' with a date of '25.05.2025'. Below this, there are toggle switches for 'Loading included' (off) and 'Unloading included' (on). Two cargo input boxes are visible: 'Cargo #1' and 'Cargo #2'. Each box allows selection of 'Calculation Type' (Cargo Unit or Cargo Batch) and 'Input Type' (Total Volume or Pallets). 'Cargo #1' is configured with 'Euro Pallet' type, dimensions of 1m x 1m x 1m, a weight of 1000kg, and 10 pallets. 'Cargo #2' is configured with 'Total Volume' input, 1 m³, 1000kg weight, and 10 units. To the right, a search dropdown menu is open, showing options for 'LCL', 'FCL', and 'AVIA'. At the bottom, there are checkboxes for 'Requires special shipping conditions' (checked), 'Hazardous Cargo', and 'Temperature-Controlled Cargo' (-10°C).

Information on possible additional costs at the end of each quotation

Placing an order in one click

Sea, rail and air modes of transportation

Constantly updated competitive rates from the world's leading carriers

FOREIGN ECONOMIC ACTIVITY

On a one-stop shop basis

Online calculation of shipping costs

Constantly updated rates and algorithms that build separate logistic legs into a single route allow to calculate the cost of cargo delivery in a matter of minutes

Online calculation of customs and other FEA services*

Customs, inspection, certification, warehousing and other foreign trade services calculator allows to calculate the cost of a complex logistics contract

Instant selection of HS codes*

If an HS code is unknown, it is easy to select it by entering the name or technical characteristics of goods

Online calculation of customs payments*

Based on the HS code, it is possible to calculate customs duties, taxes and fees, as well as obtain information on other customs regulation measures

Automation of business processes*

Client's personal account allows to manage shipments and interact with managers online

*Functionality is under development and/or testing

OUR ADVANTAGES

Unlike logistics marketplaces, we take full control over transportation process and contract implementation

Wide range of FEA services
Wide geographical coverage

Direct contracts with carriers
Transparent pricing
Competitive rates

Reliable contractors
Experienced staff

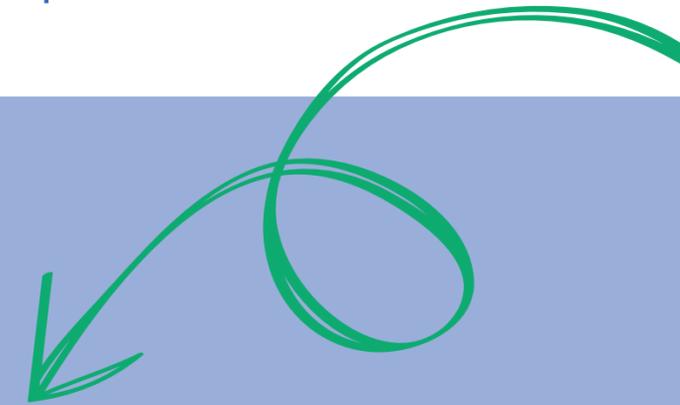

Combinatorial principle of shipping options
instead of predetermined routes

Prompt adaptation to changing market
conditions

Customization for individual customer
needs

Possibility of independent analysis and
selection of delivery option by the client

PROBLEMS WE AIM TO SOLVE

To make lives of our clients hassle-free

1 **Large time commitment** required for the calculation of foreign trade contracts and their subsequent execution

2 **High costs of in-house qualified specialists and outsourcing logistics services** which increase the entry barrier into new markets

3 Low efficiency of contractor selection due to **complex and time-consuming tender procedures** carried out offline in a dynamically changing market

4 **Complexity of working with multiple contractors** for different types of services and shipping directions

OUR MISSION AND VISION

Thanks to many years of experience, we have a deep understanding of problems faced by foreign economic activity participants and actively implement modern technologies to solve them.

Our main goal is **full digitalization of logistics processes** for both our clients and our partners.

We strive to:

- Manage all foreign economic activities online
- Optimize business processes and maximize their automation
- Provide customers with the best quality of services and efficient logistics solutions
- Create the best working conditions in the international transportation industry for all of its participants

WE BELIEVE IN PARTNERSHIP

We believe in **mutually beneficial and respectful relationships** with customers, employees and partners.

We work to help our clients' businesses grow nationally and internationally, our employees grow professionally and personally, and our partners grow their clients base and multiply their profits.
